

EthiComp and CEPE are major conferences in the field of computer/information ethics. Previous CEPE conferences themes include intercultural ethics, roboethics, social impacts of social computing, socio-technical and ethical change in ICTs, and social responsibility and ICTs. ETHICOMP, the conference series initiated in 1995 by Simon Rogerson and Terry Bynum, has likewise focused on the ethical dimensions of computing technologies. To support the missions of each entity, while providing a robust opportunity for innovative collaborative research and scholarship, Ethicomp and CEPE will partner in 2014.

Our joint conferences is hosted by CERNA (Commission de réflexion sur l’Ethique de la Recherche en sciences et technologies du Numérique d’Allistene). As well, the overlap day between the two conferences (Wednesday, July 25) is co-sponsored by ACM SIGCAS (Special Interest Group, Computers and Society), and will focus on gender and technology.
